

DATA LOGGER

The Hiweld Data Logger can record and store the pressure and time variations of the whole fusion process. It ensures that records of each fusion process can be recorded and analyzed against applicable standards.

FEATURES :

- Simple to Use
- USB data transfer
- Huge range of input options
- Has the capacity to store 100 records

Frequency	50HZ~60HZ
Power	20W
LCD Screen	DMT48270 Color Touch Screen
Power input air socket type	WS16-3
Pressure, Temp. Input Air socket type	WS16-4
Working Environment Temp.	10.C~45.C
Capacity	100 data slots
Data Transmission Interface	USB interface
Outside Box Material	Aluminum alloy box
Protection Grade	IP54
Size	l20mmx63mmx155mm
Weight	1.5kq

Authorised Distributor
